DETAILED ACTION

Preliminary Amendment

Preliminary Amendment received on 10/18/2004 is acknowledged and entered. Claims 1, 4, 5, 8-11, 13-15 have been amended. New claims 16-30 have been added. Claims 1-30 are currently pending in the application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al. (US 6,909,458 B1) in view of Prehn (US 2003/0117280 A1).

Suzuki et al. (Suzuki) teaches a computer-implemented security service managing method and system, comprising:

Claims 1, 5, 9, 10, 16, 20, 24, and 25,
upon incorporating a sensor, registering the sensor in a sensor operation information table in which a condition of each sensor is managed separately from those other sensors (Figs. 6 and 9);
the step of tracking the condition of the sensor to keep the sensor operation information table updated (C. 4, L. 38-43; C. 5, L. 9-10; C. 7, L. 33-36);
the sensor control step of obtaining a detection signal from the sensor and transmitting the signal to a monitor device (C. 4, L. 38-43; C. 5, L. 9-10; C. 7, L. 33-36);

the history recording step of obtaining the condition of the sensor from the sensor operation information table so as to record operation history of the sensor (C. 4, L. 38-43; C. 5, L. 9-10; C. 7, L. 33-36).

Suzuki does not specifically teach calculating fee and charging said fee.

However, the concept of charging fee for services rendered is old and well understood, as evidenced by Prehn, describing a security monitoring system employing remotely controlled audio and video sensors, wherein charging fee for monitoring premises is acknowledged (0004, right Column, lines 13-15).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Suzuki to include calculating fee and charging said fee, as disclosed in Prehn, because it would advantageously allow to generate funds for the system to operate.

Claims 2, 6, 11, 17, 21, 26. Said security service managing method, further comprising the operation plan specifying step of specifying an operation plan for the sensor, wherein the sensor control step includes a sub-step of operating the sensor in accordance with the operation plan (logic disclosed in Figs. 5, 7, 9, 10, and 13).

Claims 3, 4, 7, 8, 12-15, 18, 19, 22, 23, 27-30. Same reasoning as applied to the independent claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see form PTO-892).
